- **10/100 Ethernet, Auto Sensing**
- **Flat Panel Mounting Bracket (Optional)**

Windows CE Thin Clients Starting at $199

The 2008 Economy models of the YES*tation* Mini family are aimed at the Virtual Desktop Infrastructure (VDI) market pioneered by VMware. Citrix, Microsoft and others, but are equally at home in Windows Server Based Computing (SBC) environments. These low cost units can deliver a full Windows XP or Vista desktop by connecting to virtual machines running on server hardware located in the Data Center.

The model 2245 VDI edition includes three USB Ports (two front, one rear), VGA, 10/100 Ethernet, and zero foot print mounting options for only $199

The model 2242 Legacy Edition has three USB ports, a parallel printer port, a PS/2 keyboard port, and PowerTerm terminal emulation with terminal-style 122 keyboard support for 5250 and 3270 users and 20 other ASCII/ANSI terminal emulators for UNIX, Linux, and DEC users. All for only $299

YES*tation*s have no moving parts and are incredibly reliable. Standard warranty is a three-year advance replacement program. Some ThinClient Vendors charge up to $65 additional for advance replacement.

A five year advance replacement option is available at time of purchase.
